WORK OF KIWANIS CLUB COMMENDED

Former State Superintendent of Schools Deplores 'Per-nicious' Literature.

MANNINGTON, Nov. 1.—Prof. Thomas C. Miller, former state superintendent of schools in West Virginia, attended the Kiwanis luncheon here yesterday and delivered a short address along educational lines.

Kiwanians were congratulated by Professor Miller on the work being done in the country, and the local club was especially spoken of for the present effort it is making to extend its membership and influence out into the rural districts.

The cities in general have been taking care of themselves in most ways, he declared, and especially in the way of educational and industrial development. This is not true to so great an extent in the country sections, it was pointed out, and Professor Miller expressed his pleasure at the effort now being made in Mannington to link together in firmer bonds the interests of the city and country.

Education Week and its purpose was dwelt upon for a few minutes, and the speaker eloquently pleaded for hearty co-operation on the part of Mannington's business men in the work.

"I have always been a booster for better conditions," he said, "for better salaries, and longer terms. There has been, in the last few years, a tendency to neglect the improvement of our present school system all over the state, but I am glad to say that there is this year a general awakening. Improvement will be made if the people desire it."

"Sometimes we lose sight of the real education," he added, "and think of it as a thing secured from books alone. But after having spent more than half a century in the work I find myself thinking more of the school of life. Life as it is taught in daily associations, in good books, good magazines, and in good newspapers."

He spoke of the "pernicious" literature now sold under attractive titles and cover which has supplanted the old-time dime novel. The effects are the same, he declared; probably worse, he quoted a favorite saying, "We know how to read, but not what to read."

In this connection Professor Miller spoke of the present tendency to teach educational science to high teachers, how to utilize the forces of nature, and pointed out that educational science is responsible for the advance of the age.

"It may be that some boy or girl of your community," he said, "will sometime transform the life of that community." He continued, pointing out why education is necessary for this reason.

Professor Miller, who was formerly intimately acquainted with the life in Mannington District, expressed surprise and pleasure at the changes that have been made in the city and district, and said that he had always believed Mannington people to be progressive.

Reports from Smithfield in regard to the contemplated improved road stated that a committee of citizens from that community has been appointed and is completing the details of the enterprise. It was first planned to ask for a bond issue, but this has been given up and the new arrangements provide for an additional levy of 50 cents to cover the expenditures.

A. L. Prichard reported that the viewers, accompanied by county engineers, have been over the road to St. Leo and have made a relocation. It is said, however, that the proposed change may cost more than at first thought, and the project may be held up for some time because of the unexpected cost. The general impression is, however, that the road will be changed.

D. F. Hollibaugh, chairman of the committee to arrange an appropriate celebration on Armistice Day, asked if the Kiwanis Club desired to send a delegation to join in a parade at 11 o'clock on the morning of November 11. It was decided that the club would not be represented as a unit.

The attractions so far scheduled for that day include an address by Judge W. S. Haymond of Fairmont, who will speak from the Central School steps, the American Legion is planning to pay tribute to the Buddies left beneath the poppies in Flanders Fields by means of a miniature cemetery similar to the one on the school campus last year, and in addition special music, essays, and a big parade will be featured.

Entertained Band
Mr. and Mrs. Virgil Jones royally entertained the Shinnston Novelty Band at their home Sunday. A luncheon of all the delicacies of the season was served at the noon hour.

The guests were Mr. and Mrs. Bertha Robinson of Bridgeport, Mr. and Mrs. D. D. Robinson of Oak Dale, Mr. and Mrs. F. L. Sturm and son Everett of Ringwood, Mr. and Mrs. Silas Reynolds of Farmington, Mr. and Mrs. D. C. Jones of Mannington, Mr. and Mrs. Roy Jones of Stringtown, Miss Hilda Hines of Clarksburg, Miss Alta Jones of Mannington, Ward Reed and Jack Bredbenner of Shinnston, and Wayman Robinson of Mannington.

CHICAGO WILLING TO PLAY PRINCETON AGAIN

CHICAGO, Nov. 1.—If Princeton is willing to continue football relations with the "big ten" and should propose another game next year the proposal will receive "every consideration" by the Maroons, according to A. A. Staggs, athletic director of the University of Chicago. Mr. Staggs expressed his attitude on future intercollegiate games when he learned of Yale's invitation to Iowa to play another game in 1923.

PAVING ORDINANCE PASSED BY BOARD

MANNINGTON, Nov. 1.—The paving ordinance providing for new paving in Furbee and Beary avenues and the two approaches to the bridge over Pyles Fork in Brookside was read this week for the third and last time, and passed by the city commissioners. The ordinance is now ready for publication and will be rushed through as soon as possible.

In addition to the proposed paving on Jefferson and Monroe streets several other smaller improvements were discussed and will probably be carried out before long. Right now street improvement is receiving a lot of attention from the city commission.

The question of securing new equipment for the fire department was taken up once more and a sharp discussion held. While there was definite plans made there is every indication that some action favorable to the desired additional equipment will be taken soon.

The next meeting of the commission will be held Monday evening.

LEGION TO CONDUCT DRIVE THIS WEEK

MANNINGTON, Nov. 1.—The members of the American Legion here are organizing their forces for some intensive work in the Salvation Army Home Service Drive being made throughout the county this week.

The local boys will make Friday and Saturday the big days, and hope to put Mannington among the leading supporters of the movement in Marion County.

Since its great work with the soldiers in the camps and in France the Salvation Army has been gaining in the respect and love of American people, and it is anticipated that the public will aid generously in this campaign for funds with which to conduct the home service department and care for the little children.

DR. DEAHL TO SPEAK TOMORROW EVENING

MANNINGTON, Nov. 1.—Dr. J. N. Deahl of West Virginia University will make the principal address at the evening program to be given at the Central School Auditorium tomorrow evening at 8 o'clock.

Doctor Deahl is well known here and the patrons who attend the exercises will be assured of something worth while in an educational way. The subject of his address, Superintendent D. C. Tabler stated today, will be "What Our Public Schools Stand For."

Many other attractive numbers have been arranged for both the morning and evening programs, and it is believed that the public will thoroughly enjoy each session.

TWO ARRESTS MADE HALLOWE'EN NIGHT

MANNINGTON, Nov. 1.—Dick Thorne and John Baker were taken to the city jail and locked up last night by Chief of Police J. W. Eflaw assisted by Night Policemen Musgrave and Wells, after each had done his best to beat an officer. It is charged. Later each man put up a \$500 forfeit for his appearance in police court Saturday night at 7 o'clock and was released.

It is alleged that while Chief Eflaw was attempting to get one man who was overly noisy to go

home Thorne aimed a wallop at Policemen Musgrave which found its mark. Baker immediately joined in the fun and landed on the chief it is said, assuring the bystanders that they couldn't be taken to jail.

One young woman was arrested near the traction office for carrying seats out into the street. Others were implicated in the affair, but Chief Eflaw could not catch any of the others, he said this morning. Her father appeared in court for her this morning.

There was a large crowd on the streets last night, and frolicking was strong at times, but there was little disturbance of any nature, it is said.

NEELY TO SPEAK
MANNINGTON, Nov. 1.—M. M. Neely Democratic candidate for the United States Senate, will make an address from the high school lawn here at 2 o'clock Saturday afternoon. It was announced yesterday by the local committee.

Following his address here Mr. Neely will return to Fairmont where he is to make another address in the evening.

WOMAN'S CLUB CENSORSHIP
Criticism and comment on the attractions at the local theaters appearing in this column are furnished by the woman's club of Fairmont. The West Virginian does not assume any responsibility for the opinions expressed.

The Blue Ridge.
Life is made up largely of mysteries, and if we would try to solve them all we would be more mystified than ever so most of them we accept or let alone, as it pleases us.

We are free to say that Lora, who has been giving demonstrations of her remarkable power at the Blue Ridge this week, is a marvel, but further than that we do not attempt to fathom.

As to how, when or where, she received her mental attainments we know absolutely nothing, but that she is a very remarkable and interesting young woman everyone who sees and hears her must admit.

Her work is the outstanding feature at the Blue Ridge this week, but there is, in addition, three acts of vaudeville, and a motion picture, "Two Wise Wives," which is intended to make wives appreciate their husbands, and for husbands and wives, it might carry a moral, but it is not for young people.

The woman in the case, as played effectively by Anita Stewart, had been an artistic model, and having married a rich young man rich in his father's name only—found in time that his allowance had ceased, because of his father's disfavor, and so as her husband could find no work, and the board

ing at the Nelson, had been told that this was to be his last opportunity to appear in pictures, and he must make the most of it, and then he had set about putting into the film all the stunts that he had hoped to accomplish in a life time, this one—in our opinion—would be a pretty fair sample of the result.

We like Charles Jones, for he impresses us as being an earnest, hard working young chap, and he is always on the side of right in whatever vehicle he is starred, but we are rather concerned as to what he is going to do for new ideas for his pictures from now on, for it would seem that he has about exhausted them all in this one thriller.

Most of the action is brought about in his attempt to capture a villain, who has won dishonestly in a horse race, murdered a man, and abducted the girl whom he loved.

NEW THEORY OF TIRED BUSINESS MAN ADVANCED
PEORIA, Ill., Nov. 1.—Advancing a new theory, contrary to most previous belief concerning chronic fatigue, Dr. Edward H. Oschner, Chicago, president elect of the Illinois Medical Society, in an address at the Tri-Medical Association convention last night defended the "tired business" man as suffering from an accumulation of fatigue material or toxing.

The disease, he said, is a condition particularly likely to affect hard working, successful business men at an age just when they are most needed in a growing business. The sloven, the laggard, the phlegmatic and the weak-willed are rarely ever affected. Rest, while important, serves only to check the accumulation of fatigue.

An important surgical discovery was introduced in an address by Dr. John T. Finney, head of the department of surgery of John Hopkins University, Baltimore. The new theory involved a new method of connecting the intestines to the stomach in an operation for disorders of that organ.

The Nelson.
If Charles (Buck) Jones, the hero in "The Fast Mail," now appearing at the Nelson, had been told that this was to be his last opportunity to appear in pictures, and he must make the most of it, and then he had set about putting into the film all the stunts that he had hoped to accomplish in a life time, this one—in our opinion—would be a pretty fair sample of the result.

The American People

Stop for 10 Days

Stop brushing teeth in ineffective ways
See what new beauty this new way brings

Nearly all the world over, leading dentists are advising people to brush teeth in a new way. Millions of people now do it every day.

You see the results wherever you look. Teeth now glisten which once were dim. Women have new charm, new beauty. They show teeth when they smile.

This is to urge all other people to try this method now. Your druggist will present you with a ten-day tube. Cease your old methods for a few days and see what this new way does.

Why teeth look dingy

Your teeth are coated with a viscous film. You feel it with your tongue. It clings to teeth, enters crevices and stays. Food stains, etc., discolour it. So that film, if left, soon forms the basis of thin dingy coats. Tartar is based on film.

No ordinary tooth paste can effectively combat it. So millions of teeth brushed daily were clouded more or less.

Film also holds food substance which fer-

ments and forms acid. It holds the acid in contact with the teeth to cause decay. Film forms a breeding place for germs. They, with tartar, are the chief cause of pyorrhea.

All these troubles were constantly increasing. Very few escaped. The tooth brush, used in old ways, left much film intact.

The war on film

Dental science then began a war on film. After long research, two effective film combatants were discovered. Able authorities amply proved their efficiency. Then they were announced, and since then leading dentists everywhere have been urging their adoption.

One acts to curdle film, one to remove it. And this is done in scientific ways, not by harmful scouring.

A new-type tooth paste was created, based on modern research. It brings other new results now considered essential. It avoids several old mistakes. In this tooth paste are

embodied these two great film combatants. The name of the tooth paste is Pepsodent.

Two other new effects

Pepsodent brings two other effects which research proves essential. It multiplies the starch digester in the saliva. That is there to digest starch deposits which may otherwise ferment and form acids.

It multiplies the alkalinity of the saliva. That is Nature's neutralizer for the acids which cause decay.

It was found that tooth pastes based on soap and chalk brought just opposite effects. That is one reason why they proved so ineffective. They reduced the tooth-protecting agents which Pepsodent increases many fold.

These results mean a new dental era. They mean that your children need not suffer what you suffered from your teeth. They mean that film-coats can be combated.

A few-day test will prove this to you. Make that test in fairness to yourself.

Some Fifty Nations

Use this new way now

Careful people of some fifty nations now use Pepsodent, largely by dental advice. To millions of women it has brought new charm, new beauty. To men of many races it has brought teeth they love to show. To children it has brought protections which their childhood did not know.

Present the coupon for a 10-Day Tube. Note how clean the teeth feel after using. Mark the absence of the viscous film. See how teeth whiten as the film-coats disappear.

What you see and feel will very soon convince you. You will be delighted and amazed. Cut out this coupon so you won't forget, for this test is important.

Flaggy Meadow

New School Flag.

A large American flag was raised above the Flaggy Meadow School by the students Thursday morning. While the flag was being raised the pupils stood at "attention" and sang "Old Glory."

The money for the flag was raised by the pupils through the sale of pencils secured for the purpose. These were sold to the patrons, children, and friends of the school.
